Experience

Co-Creation Hub - Frontend Engineer (Remote) **Oct 2020 - Present**

- Working with the design and health team to develop various health tech products. One of these products helps to provide an opportunity for members to lend their expertise and resources to conduct research on epidemiology. Another is a dashboard that is used to manage and record Covid-19 tests carried out. It is supported by a Progressive Web Application for medical volunteers involved in carrying out Covid-19 tests

Globus Bank Limited - Frontend Developer **Oct 2019 - Sep 2020**

- Worked closely with the UI/UX Designer to develop Corporate Internet Banking (CIB) and the Customer Onboarding web applications

- Collaborated and shared ideas with the Backend Engineers to develop the Application Programming Interface (APIs) for the customer onboarding, retail, corporate web applications

- Rebuild the Retail Internet Banking application using modern Javascript.

Techpoint.Africa - Lead Developer **Dec 2018 - Sep 2019**

- Spearheaded the development of the Techpoint Intelligence platform that automates the sales of the annual startup funding reports

- Lead the team in developing Techpoint "Build" and "Inspired" event platforms

- Hosted and ensured the smooth running and maintenance of all web applications on Linode Server

Freelancer - Freelance Software Developer **2017 - Sep 2018**

- Developed and maintained client & server-side applications with given sets of requirements for small businesses
